Card lock work with software

BASIC COMPONENTS FOR HUNE CARD LOCK SYSTEM

1. **Computer**---Install Lock System in Computer/laptop with Win7/8/10 System
2. **Encoder** --- Connect to Computer by USB port. Encoders work simultaneously in same network.
3. **Lock**---Can store latest 240 unlock records
4. **Card**---Temic/Mifare card workable in this system. (100,000 times durability)

OPTIONAL COMPONENTS FOR HUNE CARD LOCK SYSTEM

1. Data Register---Collect Unlock information
2. Energy Saving Switch--- Insert door card to turn on illumination(lighting) system and air conditioner system
3. Elevator Controller/Access Reader---Read card information to release access permit to specific floor or sites
4. NFC Mobile---Collect unlock information, reset lock clock, emergency open, send information to lock

MF Read-write Card/
MF Card Encoder

Data card

H-DRRF7
RF Data Register

Bluetooth elevator controller

ADVANTAGE CLARIFICATION

Encrypted Information Transmission
Encrypted transmission technology to ensure information security

Restrict Guest Card Function
Can make Stop Card to stop corresponding card from unlocking, for emergency or specific case

Invalid The Lost Card
The lost card can be invalid easily via computer or NFC device

Alarm Of Not Closing Well
Most of mortise can have alarm of not closing well

Access Permit
Guest card can be used for accessing public area or control elevator to go to specific floor

Anti-Pick Function
Anti-pick latch will prevent the lock from picking

Panic Release Function
Panic release function for emergency escape;

Automatically Data Backup
Automatically data backup function to ensure quick reset and data safety.

Lock Mode Switch
Automatic Lock-- Lock 7 seconds after unlock
Always Open--- Always open mode for conference room and public area

No Disturb Function
Once guest switches deadbolt to lock status, only master card can open the lock for emergency to avoid any disturbance to guest;

Multi Function Card
Mifare card can be added consumption, public area access or power control functions;

Authorized System For Your PMS (Certificate KYU5003-091)
Offer DLL Interface which can be integrated to many PMS system, such as Fidelio/OPERA.
SQL Database server allow more than 1 user computer use system to issue cards at the same time

Low Maintenance Cost
No professional devices required to save your maintenance cost

Easy Operation
Multi Language version available and simple installation

System Compatibility
System is workable in Win7/8/10 system

Easy operation
Accessible user interface show room status clearly and ensure easy operation

Wireless Lock System
Battery Power Lock and no wire required. Simple Maintenance.

Time Setting For Access
Set time limitation in lock for unlocking.
Can send new time information to lock and avoid inconvenience caused by summer and winter time difference

Preventing Re-Entry
Once new guest card valid,the old one will be invalid automatically to prevent re-entry

Non Volatile Memory
Memory will not ger lost even power off

Event Audit Trial Function
Lock can memorize the latest 240 unlock records to help management

Mechanical Key Record
Most mortise can have mechnical key record

Card Recycle Use
Room card can be designed and for 100,000 times use

NFC Management
Install APP in Android phone to implement long distance lock management via NFC

Complete Information For Tracking
Can track all the operation record such as booking, card issue, checkin, checkout, room vacancy

Huge Capacity of System
Can manage the locking plan up to 64,000 doors

Cards can be authorized to several level to ensure security
- **Master Card**
  Suggested User: COO, General Manager or Owner of the hotel
  Authorization: Unlock all locks in system even in debolt lock status

- **Building Card**
  Suggested User:General Manager
  Autorization: Unlock all locks in corresponding building

- **Floor Card**
  Suggested User: Room Keeper
  Autorization: Unlock all locks in corresponding floor

- **Guest Card**
  Suggested User: Guest
  Authorization: Guest can unlock corresponding room in specific period
  Note: Card be be set to open maxium 7 doors
  Card can be set the number of permit times of unlocking

Multi Level System Authority
Can set differnt authority for system user in computer

Card lock work without software

--Security Your Home Or Office

- No Need wiring
- No Need software
- No Need Encoder
- No Need computer
- Easy to setup

Function card: 【Mother Card】, 【Key Card】

- The Mother Card is used to create Key Card
- The Key Card is used to open the door

The same Card can be shared by all of the locks.
(lock just memory card ID).

Mode 1

■Creat Mother Card
Press "Reset" buttom, touch lock reader with pre-supposed mother card

■Creat/Terminate Key Card
Touch lock reader with mother card
Touch lock reader again with pre-supposed key cards.

■Terminate All Key Cards
Touch lock reader with mother card 3 times then termination is successful

■Terminate Specific Key or Clone Cards
Touch lock reader with mother card then touch lock reader with specific key or clone cards

Mode 2

■Creat Mother Card
Press "Reset" buttom, touch lock reader with pre-supposed mother card

■Creat Key Card + Clone Card
Touch lock reader with mother card
Touch lock reader again with pre-supposed key cards.
Touch lock reader with pre-supposed colone card (Clone card is child card of key card)

■Terminate All Key Cards
Touch lock reade with mother card 3 times then termination is successful

■Terminate Specific Key or Clone Cards
Touch lock reader with mother card then touch lock reader with specific key or clone cards

.... More modes are possible

- **Open the door:**
  Touch the Key Card, turn the handle, then the door open, and after a while the lock locks automatically.
- **Set Always-open state:**
  Touch the key card, and do not turn down the handle, touch the same key card again within 3 seconds.
- **Mechanical key override:**
  Can use mechanical key to open for emergency.
- **Key Card can be set to deadbolt override or not.**
- **Access audit trail is possible.**

More flexible functions can be done for you. Please contact HUNE for more detail.

◆Lock Setting

Set room number or clock of the lock via NFC phone easily.

◆Emergency Unlock

Unlock in emergency under authorization via NFC phone

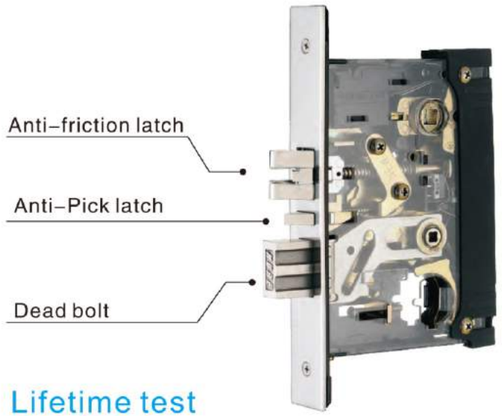
◆Reading unlocking record

Read unlocking record from lock by NFC phone. And synchronize the unlock data to management system in PC.

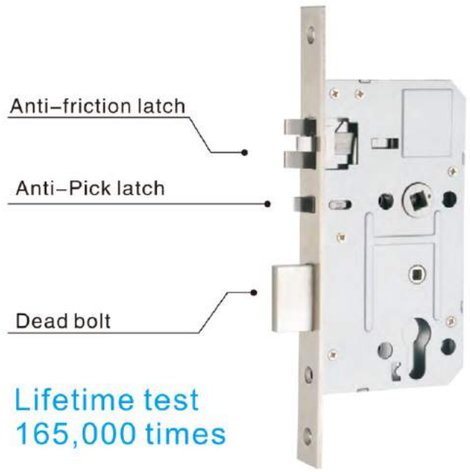
◆Invalid Room Card

If customer checkout earlier without returning card , card can be terminated via NFC phone directly.

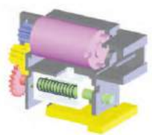
Mortise and electronic are the most crucial parts to electronic lock stability. HUNE has our own R&D and Electronic Engineering team to ensure the state of art technology to meet market and more security hardware solution for your safety.



Mortise ANSI



Mortise European 6#

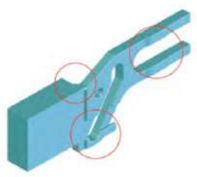


High–performance motor

We adopt the special coil spring to drive the lock pin, which increase the stability greatly comparing with the locksets from other factories . High–performance motor reduces the case as wood slice blocking the lock pin, thoroughly solves the unstable situation when the guest turn down the handle and touch card at the same time.

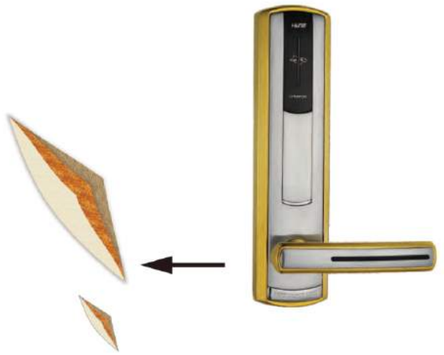
Anti–friction latch move in track

When close the door, the strike plate only contact with the little latch in middle, greatly reduced the force area, not only reduce the strength when close the door but also reduce the wear and tear on the surface of the latches.



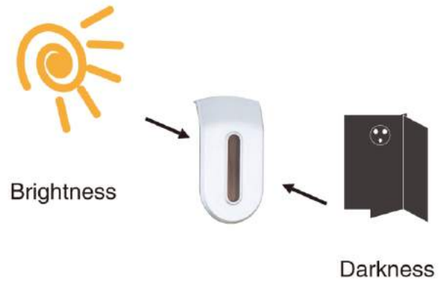
HUNE ANSI Deadbolt Latch with strengthened structure,

Effectively prevent the latch to be bent or cracked when close the door due to wind or manmade cause. We improve the latch by strengthening the structure, the majority of the force concentrate in the thickest position of the latch (12mm thickness), and the distance of stress point is greatly shortened, so the force durable of the improved latch is 5 times upgrade. Other factories still use the old structure, the most force stress on the weakness position of the latch (3mm thickness), this make the latch bend easy, and the latch can not completely retract back, that cause the door can not be unlocked of locked normally. HUNE improved mortise can be installed on a heavy door like solid wood door and steel door .

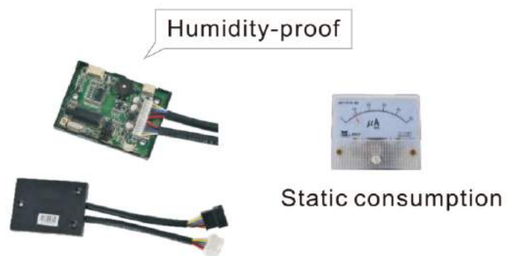


Material thickness 2mm,
Plating: Brass 10μm, Nickel15μm,
Chrome 0.2~0.25μm
Salt Spray Test 72hours

Utilize wearable PVD or chrome plating technology, to process the finish of lock cover, after many years use, the lock stilllooks like new one. Reinforced plate improve the performance antide-struction.



RF card locks adopt energy-saving technology, utilize micro-wave or infrared to detect the approaching card. And make sure can read the card correctly no matter in brightness or in darkness. Some other factories product either run out battery easy, or cannot make sure read card well.



Main board

HUNE main boards(PCB) with self-check function, process information correctly and stablely. HUNE lock run with super low consumption. Static consumption for IC card lock is 3uA, for RF card lock is 10uA, IC card lock is by 4AA / AAA alkaline batteries, with a normal lifetime of 24 months. RF card lock is powered by 4AA / AAA alkaline batteries, with a normal lifetime of 18 months. HUNE main boards(PCB) are sealed with silica gel to make sure can work well even in high humidity environment.

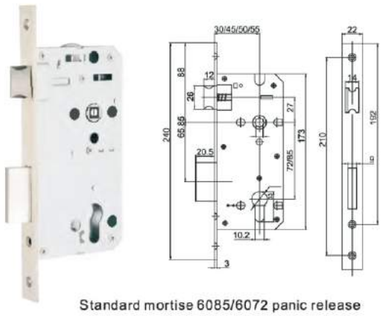
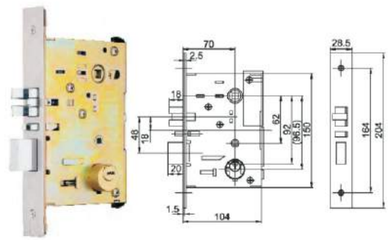
Optional mortise 6#

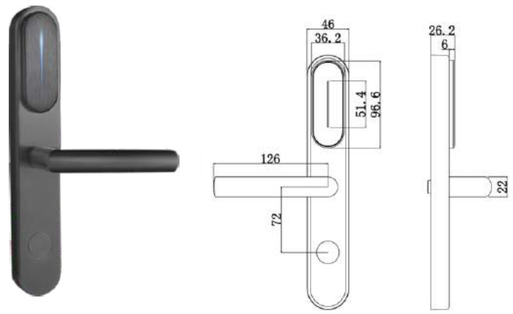


Standard mortise 6085/6072 panic release



Optional mortise ANSI

- 304 Stainless steel
- Applicable with European standard mortise or ANSI mortse
- Replace old mechanical lock easily, No need to change old mortise or old door
- Detect card mode: advanced Micro Wave
- Hidden cylinder cover
- Can work with software or without software (should specify when give order)
- Suitable for Hotel, Commercial office, School, Government, Hospital, Marine, Residence.
- Axis distance from handle centre to cylinder can be 92.5mm,72mm,85mm



929VTW-D
Stainless steel

Applicable card:	Mifare 1,Desfire Optional,Bluetooth Optional
Material:	Stainless steel 304
Mechanical key override:	Yes
Battery:	4 standard AAA alkaline batteries, 18 months in normal state
Indication:	Light,Sound(Mute,Beep,or music optional)
Deadbolt Indication:	Blue and red light when touch key card
Unlocking record for trail:	Yes
Low voltage warning:	Yes
Passage mode for meeting room:	Yes
Static consumption:	12uA
Dynamic consumption:	300mA
Humidity:	20%-80%
Working temperature:	-10°C~60°C
Handle optional:	None
Packing:	8PCS/CTN 22KGS/CTN 68*35*27CM/CTN

930SS-62-D
Stainless steel

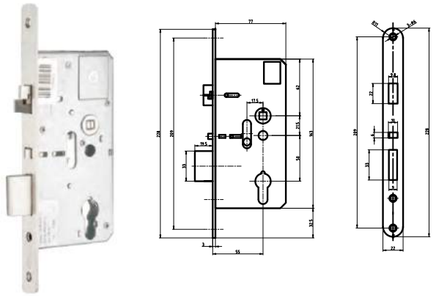
- 304 Stainless steel coverplate reinforced by a 1.8mm thickness steel plate for added security
- Applicable with ANSI standard mortise
- Anti-panic exit function
- Detect card mode: advanced Micro Wave
- Suitable for Hotel, Commercial office, School, Government, Hospital, Marine, Residence.

930BP-62-D
Golden PVD

Applicable card:	Mifare 1,Desfire Optional,Bluetooth Optional
Material:	Stainless steel 304
Mechanical key override:	Yes
Battery:	4 standard AA alkaline batteries, 18 months in normal state
Indication:	Light, Sound (Mute, Beep, or music optional)
Deadbolt Indication:	Blue and red light when touch key card
Unlocking record for trail:	Yes
Low voltage warning:	Yes
Passage mode for meeting room:	Yes
Static consumption:	12uA
Dynamic consumption:	300mA
Humidity:	20%-80%
Working temperature:	-10°C~60°C
Handle optional:	None, Client specified
Packing:	6PCS/CTN, 18.5KGS/CTN, 50.5*36*53CM

Classic style smart lock

Contactless technology



Optional mortise 3#

Energy-saving Switch

is specially designed for hotel to save energy and money when the guests are not in their room.

0309-2 MCP(Mifare 1 Card)
0309-2 TCP(Temic/ID Card)

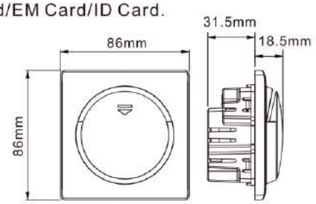
0309-2 MGS (Mifare 1 Card)
0309-2 TGS (Temic/ID Card)

- **Insert the Key Card to turn on the power (Light and Air Conditioning etc)**
- **Remove the Key Card, the power will be turned off automatically after 15 seconds, thus saving money.**
- **Simple installation.**
- **LED for easy location when entering the room in the dark.**
- **Optional (should specify when give order)**
  - Can be set to only works with hotel specific Key Cards. (Business cards, Staff Key Cards and HUNE Key Cards belonging to other rooms will not activate the power supply)
  - 2 relay outputs (1 for lighting, 1 for Air Conditioning) Window detector input. If window is left open, the system will turn off the Air Conditioning.

Specification for different model

0309M / 0309-2M: work with Mifare 1 Card.
0309T / 0309-2T: work with Temic Card/EM Card/ID Card.
9908: Work with any type of card
(card color cannot be black or dark grey)

Other specified card type maybe possible for special order.

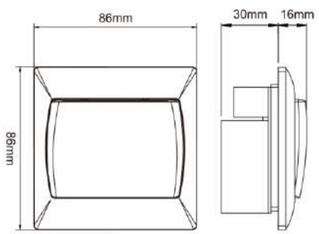


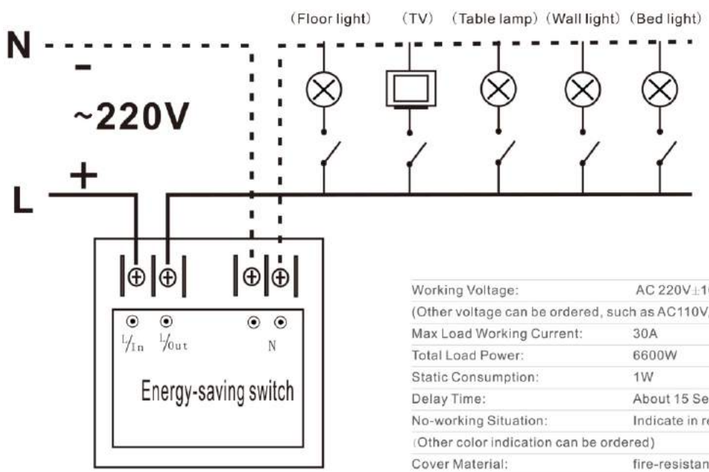
0309M (Mifare 1 Card)
0309T (Temic/ID Card)
9908(Any Card)
0308(IC Card)

0309 M2(Mifare 1 Card)

(Golden finish)

(Silvery finish)





Working Voltage:	AC 220V±10%
(Other voltage can be ordered, such as AC110V, DC 12V)	
Max Load Working Current:	30A
Total Load Power:	6600W
Static Consumption:	1W
Delay Time:	About 15 Seconds
No-working Situation:	Indicate in red
(Other color indication can be ordered)	
Cover Material:	fire-resistant PC
Weight:	170g
Packing:	100PCS/CTN,18KGS/CTN,46.5*33.5*40CM

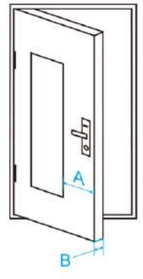
Right–hand reverse
(Pull to open)

■I INSTALLATION INDEX



A,Frame width: The distance from the decoration edge to the door edge

- ANSI MORTISE:A should above 120mm
- EURO MORTISE:A should above 90mm

B,Door thickness: The door thickness

- ANSI MORTISE:B should above38mm
- EURO MORTISE:B should above 28mm

ELECTRONIC SAFE

HUNE electronic in-room safes are designed for hotel, residence and commercial office with comfort, convenience and security.

HUNE electronic in-room safes easily accommodate the users generally have, from personal effects, to laptop, to larger items that need to be secured.

- Model 129 can accommodate 14-inch laptop
- Model 128 can accommodate 13.3-inch laptop
- Large digital LED display.
- 1 to 9 digit optional password by guest.
- User-friendly operation. What password to close, then what password to open.
- Manager password for standby.
- Clear and simple instruction is printed on the panel.
- Safe gate made of 5mm thickness high strength solid steel.
- Mechanical key override for emergency.
- 4*AA alkaline battery can last for 18 months.
- Easy to change battery.
- Outlet for external power supply.
- Event audit trail possible
- Shutdown mode: After 3 times repetitive unsuccessful attempt, the safe enter shutdown mode for 3 minutes.

User-friendly operation

-To Close

In unlocked state, input your optional password +"#", the safe displays "CLOSED" and locked.

-To Open

Input your password + "#", the safe displays "OPENED" and open.
